

# Smart Studio™

[www.smartstudioinc.com](http://www.smartstudioinc.com)

## One day all studios will be built this way

- World class professional studio solution
- Unique modular build-off-site approach
- Substantially reduced turn-around time
- More cost effective than the traditional process

High Level of  
Sound Insulation

Detailed Room  
Acoustic Conditioning

Low Background Noise  
Air Conditioning

## The Process

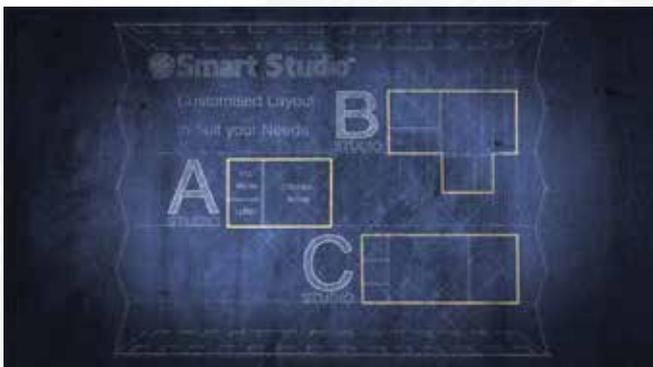

**Smart Studio™ (Patent pending)** has been developed in response to a growing level of dissatisfaction with conventional methods of designing and building critical audio studio facilities.

**Smart Studio™ has disrupted the market for studio design and build.** Using a modular build-off-site approach Smart Studio™ has eliminated inefficiencies, lengthy delivery times and excessive costs associated with a traditional design build approach.

**Smart Studio™ is manufactured in our custom equipped factory facility.** This precision build process, incorporating meticulous attention to acoustic detail, is the back bone of our critical audio facility offering.

## Why Smart Studio™?

With Smart Studio™ you no longer have to project manage your new studio facility design and build.

**No need to engage a design team** of architects, acoustic consultants, interior designers, mechanical and electrical engineers, building contractors and sub-contractors.

**Our integrated approach delivers** a substantially reduced project turn-around time, with minimal disruption that saves you money.

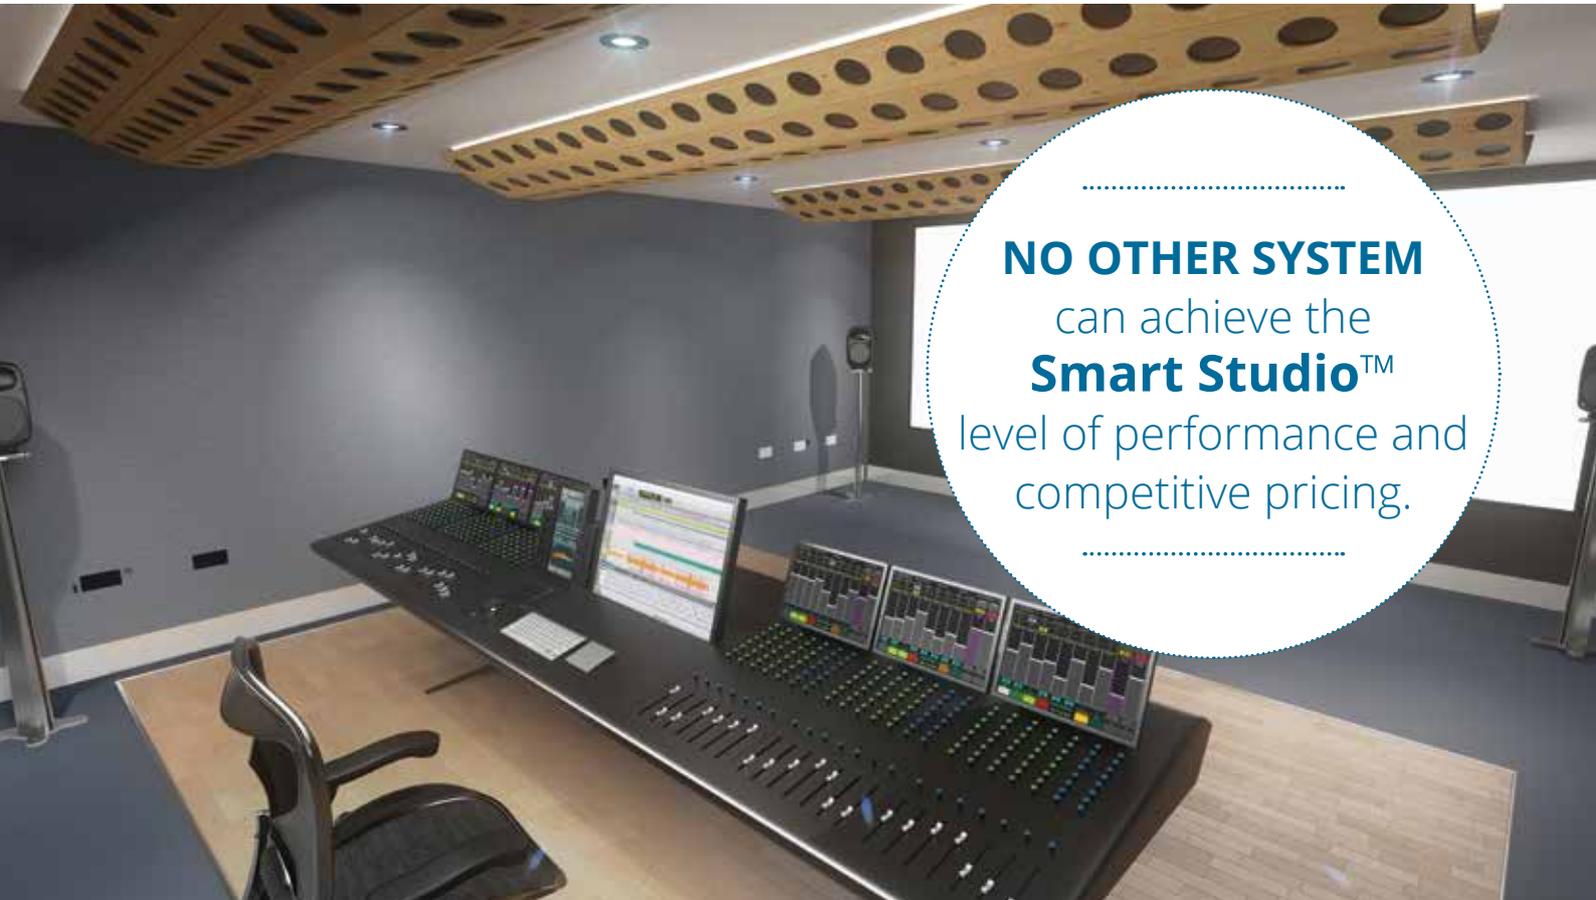

**The new generation Smart Studio™ systems exceeds the needs of today's demanding audio, video and media industries while enhancing work flow within your new facility.**

- 
- **Reduced Build times**  
Installation time is reduced to an absolute minimum with more than 50% of studio built-off-site.
  - **Reduced Cost**  
Our off-site manufacturing process cuts costs considerably.
  - **Less Disruption**  
Our unique Smart Studio™ installation system means you experience less noise, less dust and less hassle.
  - **Factory Build is Precision Build**  
Reliable, dependable outcome every time.
  - **Leasing Option**  
We offer a leasing option removing the need for high upfront costs.
  - **Environmentally Friendly**  
Efficient use of raw materials reduces waste and cuts costs.
  - **Flexibility**  
Our modular approach allows you to re-model your studio, resize it or even move to another location.
  - **Acoustic Performance**  
Each module has been designed to deliver in the most demanding of acoustic environments.
  - **Interior Design**  
With a wide range of wall, ceiling and floor finishes to choose from we can deliver on your interior design strategy.
  - **Integrated Services**  
Capturing all elements including electrics, air-con and signal cable ducting.
  - **Post-completion Testing**  
Records the entire acoustic performance of your new facility.
  - **Speaker Set-up & Calibration Service**  
Integrate your selected speaker system with your room acoustics and ensure an accurate sound monitoring environment.
  - **Immediate Budgetary Costs**  
Accurate project budgetary costing available via [www.smartstudioinc.com/cost-estimator](http://www.smartstudioinc.com/cost-estimator)
